

## Amendments to the Claims

1-15. (canceled)

16. (currently amended) A server, comprising:  
means for receiving a request from a client;  
means for responding to the request by transmitting a program of computer  
readable instructions to the client, the program for enabling the client to:  
use a specific printer having a plurality of output trays to print a  
document; and  
display an indicator that indicates the identity of an output tray from  
the plurality of output trays that receives the document and The server of  
claim 11, wherein the indicator further indicates the present capacity of the  
output tray that is receiving the document to accept additional media;  
wherein the server is the printer.

17-25. (canceled)

26. (currently amended) A printer having a plurality of output trays, comprising:  
apparatus for responding to a request received from a client by transmitting a  
program of computer readable instructions to the client, the program for enabling the  
client to:  
use the printer to print a document;  
display an indicator that indicates an output tray from the plurality of  
output trays that receives the document; and  
The printer of claim 24, wherein the program is further for enabling  
the client to inform a user of the present capacity of the output tray  
receiving the document.

27. (canceled)
